### Bamboo TwinFlex® D xg//60090

EN 388:2016

EN 407

4X41D

X1XXXX

#### Description

Never felt better: The patented Bamboo TwinFlex® technology combines the best of both worlds in one cut protection glove (Cut Level D).

On the inside of the glove: Wearers experience noticeable comfort for their skin thanks to the bamboo fibres. The smooth fit and high moisture absorption with a rapid action provides long-lasting comfort and high wearer acceptance. The glove is perfectly adapting to your individual handshape in 3 to 5 minutes wearer time.

On the outside of the glove: High-performance fibres provide reliable high-level protection against external hazards such as abrasion and cutting. The additional uvex protexxion zone in the area between the thumb and index finger provides double the abrasion resistance (200%) compared to the inside of the glove to increase its service life/durability. Thanks to the Xtra-Grip aqua-polymer foam coating, the Bamboo TwinFlex® D xg offers excellent grip in dry and slightly damp/oily conditions.

#### Characteristics

- Cut Level D, 18 Gauge, thin and light weight
- Longer service life: uvex protexxion zone (in thumb area)
- Bamboo TwinFlex® Technology: very high wearing comfort
- Effektive Grip in dry and slightly damp/oily areas
- very good tactile feel, very breathable
- Can be used with touchscreens
- Dermatologically approved for skin tolerance (proDERM®)
- Free from substances causing allergies

#### Applications

- Assembly of slightly sharp objects
- Glass- and metal industry, automotive
- Precision work
- Quality check
- Areas, where touchscreens are used

MADE IN GERMANY
